

SUMMER

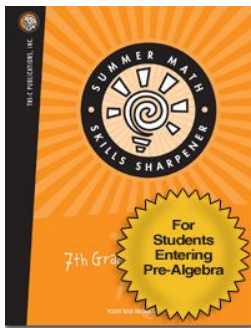

8th Grade Summer Math Assignments

This summer, in addition to reading some good books and spending time outside, you should plan to spend some time sharpening your math skills. Summer is a good time to review concepts that you found a little confusing this year and to make sure that you're ready to succeed in September. We can't wait to see you in math class at Dana Hall!

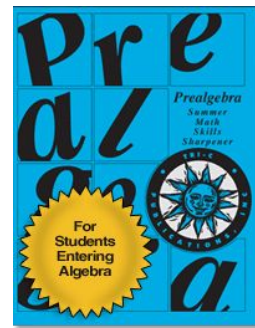

Students *entering 8th grade* have been recommended for one of three possible math courses. Choose the option that matches your math placement.

Transitional Algebra:

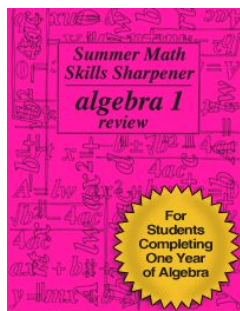

30 minutes of work per week from the **7th Grade Summer Math Skills Sharpener** book, which reviews math skills typically covered in 7th grade. **This assignment is optional but recommended.**

Algebra I:

30 minutes of work per week from the **Pre-Algebra Summer Math Skills Sharpener** book, which reviews math skills covered in the Pre-Algebra course. **This assignment is optional but recommended.**

Geometry:

30 minutes of work per week from the **Algebra I Summer Math Skills Sharpener** book, which reviews math skills covered in the Algebra I course. **This assignment is optional but recommended.**

To order the Summer Skills Sharpener books, visit the Summer Skills' website:
